

Australian report

IRAC meeting. Philadelphia
March, 2017

Diamond backed moth

- Resistance monitoring initiated in key vegetable brassica areas of Australia commencing in 2017. Funded by CropLife and coordinated by Greg Baker (SARDI)
- Monitoring for Group 28' s, emamectin benzoate, fipronil and spinetoram (if Dow on-board)

Helicoverpa armigera

- IRMS' s established for regional crop production areas
- NIRM are focusing the effort in these areas. Advantageous if CropLife and NIRM' s can work together on this project
